

## List of Questions and Responses related to the Regional Transportation Attitude Survey III Request for Proposals

- Q1. As I understand the RFP, this research project will track results from 2 prior surveys conducted in 1997-98 and 2006-07. If this is indeed the intention, then the methodology should mirror the prior studies, including questionnaire design. Can you please provide the prior methodologies and questionnaires, including incidence so that the bid will produce results that can be compared to the prior findings?
- A1. The proposal states: "It is expected the questionnaire and data collection methodology will be similar to the original study to potentially allow for direct comparisons of survey results." However, the MPO recognizes that survey technologies and methodologies have evolved over a two decade timeframe.

The two previous reports can be found on the MPO's website at
